Summary

Engineer turned AI product manager who sets strategy and ships. Sole product owner of a multi-agent GenAI research platform, plus a wider portfolio of data and AI products. **AidenResearch** is featured in NVIDIA's customer story, was presented at the Databricks Data + AI Summit, and runs across an 8,000-user Aiden platform. Builds and launches personal AI tools on the side.

Experience

RBC Capital Markets — Jan 2025 – Present

Senior Product Manager - Alternative Data, GenAI & Research Technology — *Toronto, ON*

- Shipped 7 GenAI research agents to production as strategy and roadmap owner for **AidenResearch**, one of the flagship AI initiatives behind RBC's $700M–$1B AI enterprise-value ambition.
- Drove the investment roadmap across 4–5 data and AI products, breaking a stalled MD-level prioritization deadlock on where to bet.
- Scaled document processing 10x and cut earnings-note turnaround up to 60% by shipping research agents that raised per-analyst coverage ∼17%, from 15 to 17.5 companies.
- Grew post-launch adoption 25% by running experiments and A/B tests, then shipping the changes that moved real usage.
- Set the quality bar for client-facing AI, holding agents to a 99% accuracy target with the evaluation and guardrails analysts and clients could trust.
- Led a 20-person cross-functional team across engineering, data science, risk, and compliance to ship secure AI in a regulated bank.

RBC Capital Markets — Sept 2023 – Dec 2024

Software Developer — *Toronto, ON*

- Lifted feature adoption 45% with a reusable React/Next.js/MUI component library, built into a real-time trading and reporting platform traders relied on for time-sensitive market and client decisions.
- Boosted platform performance 40% with React Query caching and API optimization, plus a charting and tooltip design that helped traders read complex data faster (comprehension +25%).

Cognizant Technology Solutions — Mar 2021 – June 2022

Programmer Analyst — *Pune, India*

- Resolved 200+ client issues and 150+ production defects on a 50-person team, building SQL pipelines and full-stack applications across the SDLC.

Personal Projects

Vibe Route | GitHub | Live

- **Google Maps tells you the fastest route; this tells you the best one.** An AI walking-route scorer that ranks streets by how they *feel* using density-based clustering and LLM-generated narratives; rejected LLM-based scoring to avoid the affluence bias that keeps Maps from shipping this, grounding the design in 6 peer-reviewed studies.

Blind Spot | GitHub | Live

- **80% of what you watch was chosen by an algorithm; this shows you what it's hiding.** Surfaces your Netflix filter bubble with content-based profiling, cosine similarity, and a Herfindahl diversity index, then uses an LLM (constrained to verified data to prevent hallucination) to recommend titles you'd never have found.

Technical Skills

AI/ML: GenAI, LLMs, AI Agents, RAG, Prompt Engineering, NLP, Model Evaluation & Guardrails, Responsible AI
Product: AI Product Strategy, Roadmapping, 0-to-1 / Innovation, Prioritization & Trade-offs, Experimentation / A-B Testing, User Research, Go-to-Market
Delivery & Analysis: Product Owner, Backlog Management, User Stories & Acceptance Criteria, Agile / Scrum, Requirements (BRD / FRD / PRD), Process Mapping, Stakeholder Management, Data Analysis
Technical: Python, SQL, JavaScript, TypeScript, React, Next.js, Node.js, Git, MySQL, MongoDB

Education

University of Windsor — Sep 2022 – Apr 2024

Master of Applied Computing — *CGPA - 8.00*

Gujarat Technological University — Aug 2016 – Aug 2020

B.E. in Computer Engineering — *CGPA - 8.98*
